

User Manual

Configuration module reference

Table of Contents

Page: Branch

Page purpose: This page allows the user to manage and view branch locations for the business.

Route: `/configuration/businessConfig/branch`

Task: Create new branch

Purpose: To add a new branch location to the system.

Required roles:

- No role restriction was identified

Prerequisites:

- Must be logged in with appropriate permissions

Steps:

1. Navigate to Configuration
2. Select Business Config
3. Click on Branch
4. Click the Create New button

Fields and controls:

- **Branch Name:** Name of the branch.
- **Branch Address:** Address details of the branch.

Expected result: A new branch is added to the list.

Warnings:

- No specific warning was identified

Search keywords: add branch, new office

Task: View branch list

Purpose: To view all existing business branches.

Required roles:

- No role restriction was identified

Prerequisites:

- None identified from the interface

Steps:

1. Navigate to Configuration
2. Select Business Config
3. Click on Branch

Fields and controls:

- **SL:** Serial number.
- **Branch Name:** Name of the branch.
- **Branch Address:** Physical location of the branch.

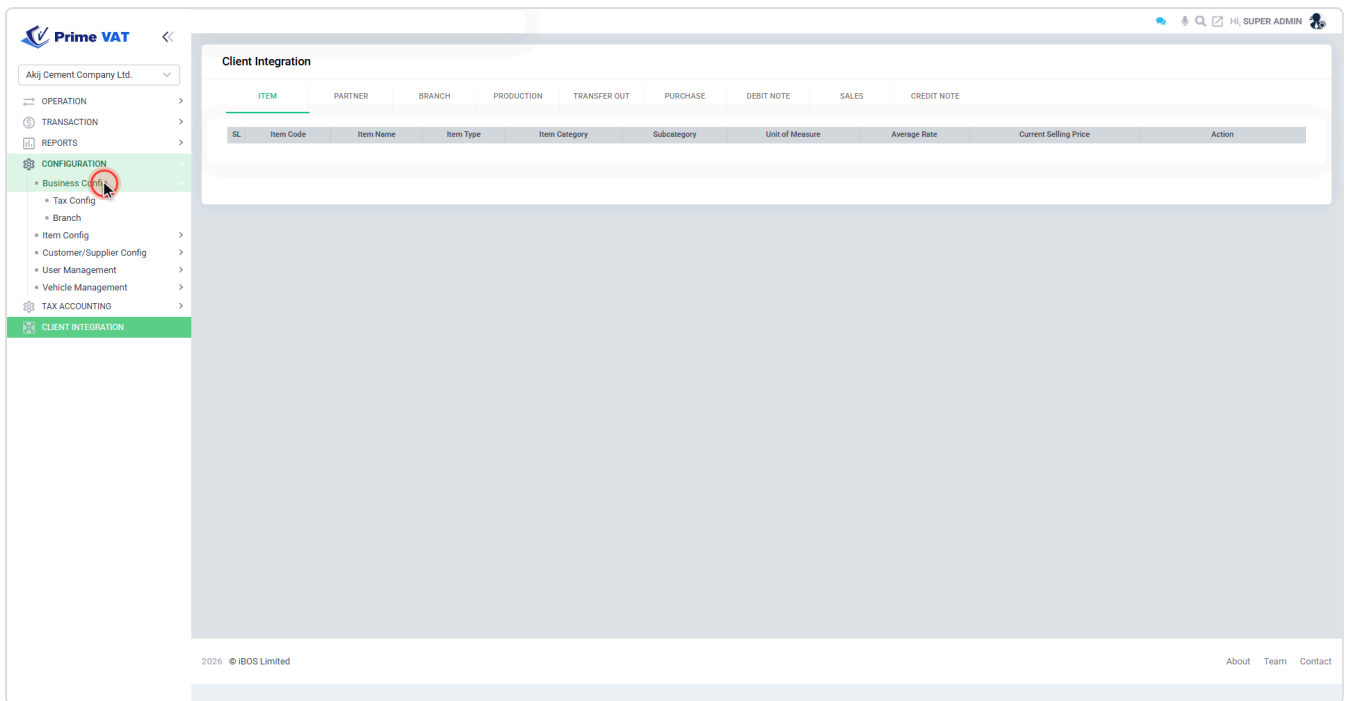

Expected result: A list of branches is displayed.

Warnings:

- No specific warning was identified

Search keywords: list branches, all locations

Page: Client Integration

Page purpose: This page contains the controls and information shown in the captured interface.

Route: <https://devprimevat.ibos.io/configuration/businessConfig>

Task: Use Client Integration

Purpose: Review and use the visible page functions.

Required roles:

- No role restriction was identified

Prerequisites:

- None identified from the interface

Steps:

1. Open the Client Integration page.
2. Review the visible controls, fields, and table columns.
3. Choose the required available action for your work.

Fields and controls:

- No specific fields were identified from the available evidence.

Expected result: The requested page information or form is displayed.

Warnings:

- Only actions visible in the captured interface are documented.

Search keywords: Client Integration, business config

Page: Change Password

The screenshot displays the 'Change New Password' page in the Prime VAT system. The left-hand navigation menu is expanded, showing the 'CONFIGURATION' section with 'Change Password' selected. The main area contains a form with three password input fields and action buttons. The interface is clean and professional, typical of a business management application.

Page purpose: Allows users to update their account login credentials.

Route: `/configuration/roleManagement/changePassword`

Task: Change user password

Purpose: To update the current user password for security.

Required roles:

- No role restriction was identified

Prerequisites:

- Must know the current password

Steps:

1. Navigate to Configuration
2. Select User Management
3. Click Change Password
4. Enter Old Password
5. Enter New Password
6. Enter Confirm Password
7. Click Save

Fields and controls:

- **Enter Old Password:** Existing account password.
- **Enter New Password:** New desired password.
- **Enter Confirm Password:** Retype new password for verification.

Expected result: Password updated successfully.

Warnings:

- No specific warning was identified

Search keywords: password update, security

Page: Client Integration

The screenshot displays the 'Client Integration' page within the Prime VAT system. The left sidebar shows the navigation menu with 'CLIENT INTEGRATION' highlighted. The main content area features a table with the following structure:

Client Integration									
ITEM	PARTNER	BRANCH	PRODUCTION	TRANSFER OUT	PURCHASE	DEBIT NOTE	SALES	CREDIT NOTE	
SL	Item Code	Item Name	Item Type	Item Category	Subcategory	Unit of Measure	Average Rate	Current Selling Price	Action

The footer of the page includes the copyright notice '2026 © IBOS Limited' and links for 'About', 'Team', and 'Contact'.

Page purpose: This page contains the controls and information shown in the captured interface.

Route: <https://devprimevat.ibos.io/configuration>

Task: Use Client Integration

Purpose: Review and use the visible page functions.

Required roles:

- No role restriction was identified

Prerequisites:

- None identified from the interface

Steps:

1. Open the Client Integration page.
2. Review the visible controls, fields, and table columns.
3. Choose the required available action for your work.

Fields and controls:

- No specific fields were identified from the available evidence.

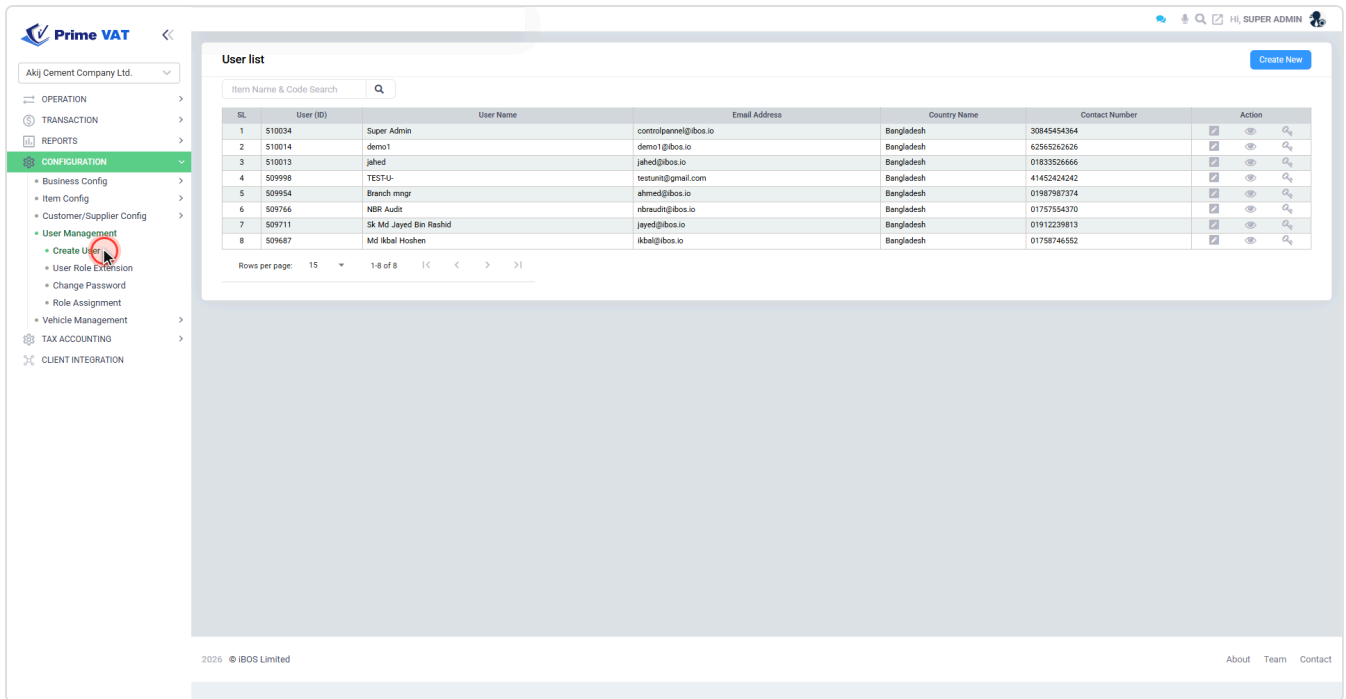

Expected result: The requested page information or form is displayed.

Warnings:

- Only actions visible in the captured interface are documented.

Search keywords: Client Integration, configuration

Page: User List

Page purpose: Manage system users and access rights.

Route: /configuration/roleManagement/createUser

Task: View system users

Purpose: To review the list of registered users and their details.

Required roles:

- No role restriction was identified

Prerequisites:

- None identified from the interface

Steps:

1. Navigate to Configuration
2. Select User Management
3. Click Create User

Fields and controls:

- **User (ID):** Unique identifier for the user.
- **User Name:** Full name of the user.
- **Email Address:** Registered email address.

- **Country Name:** Country of the user.
- **Contact Number:** Phone number for the user.

Expected result: A table of users is displayed.

Warnings:

- No specific warning was identified

Search keywords: user list, manage users

Rows per page: 15 1-15 of 160

Page purpose: Central list of all business partners, including customers and suppliers.

Route: /configuration/partnerConfig/partner

Task: Filter partners

Purpose: To find specific partners based on their classification.

Required roles:

- No role restriction was identified

Prerequisites:

- None identified from the interface

Steps:

1. Navigate to Configuration
2. Select Customer/Supplier Config
3. Click Customer/Supplier
4. Select type (All, VDS Applicable, Without VDS Applicable)

Fields and controls:

- **Customer/Supplier Name Search:** Keyword search for business name.

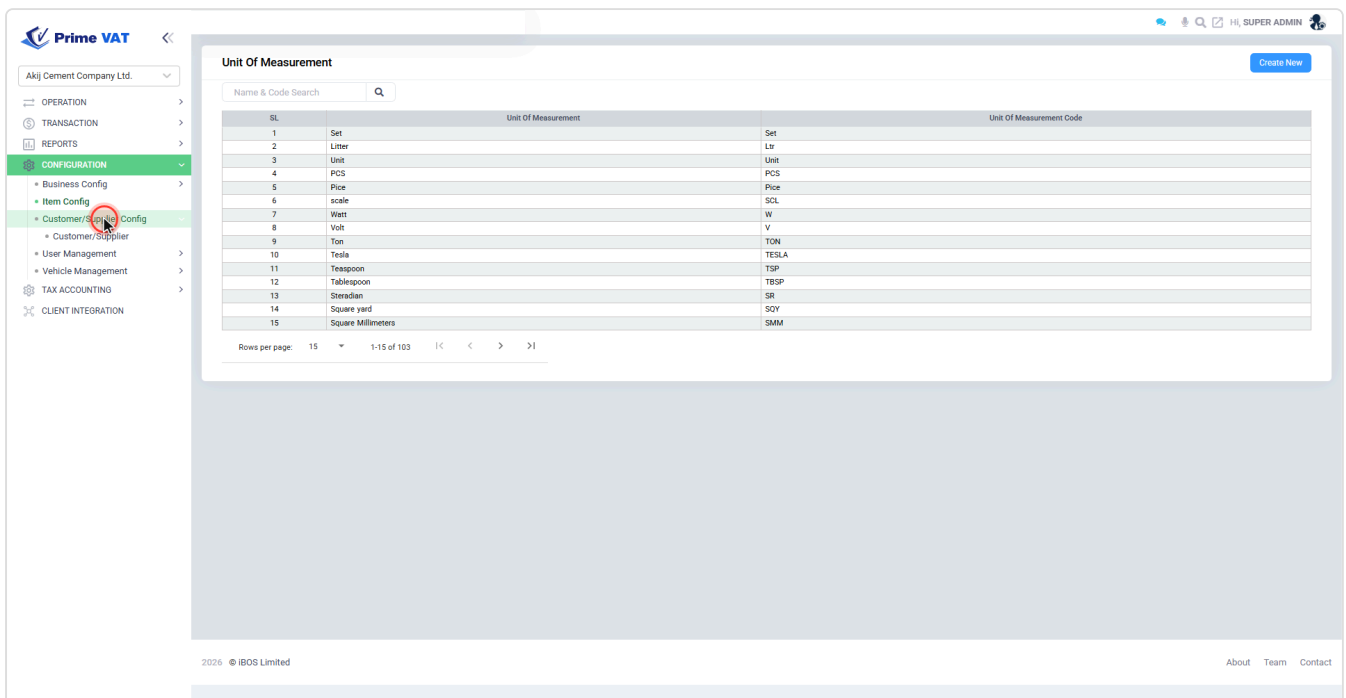

Expected result: The table content updates to show filtered partners.

Warnings:

- No specific warning was identified

Search keywords: filter customers, search suppliers

Page: Unit Of Measurement

The screenshot displays the 'Unit Of Measurement' configuration page in the Prime VAT application. The left sidebar shows the navigation menu with 'Customer/Supplier Config' highlighted. The main content area features a table with 15 rows of units of measurement. The table has three columns: 'SL', 'Unit Of Measurement', and 'Unit Of Measurement Code'. The data is as follows:

SL	Unit Of Measurement	Unit Of Measurement Code
1	Set	Set
2	Liter	Ltr
3	Unit	Unit
4	PCS	PCS
5	Pice	Pice
6	Scale	SCL
7	Watt	W
8	Volt	V
9	Ton	TON
10	Tesla	TESLA
11	Teaspoon	TSP
12	Tablespoon	TBSP
13	Stemman	SR
14	Square yard	SOY
15	Square Millimeters	SMM

At the bottom of the table, there is a pagination control showing 'Rows per page: 15' and '1-15 of 103'.

Page purpose: This page contains the controls and information shown in the captured interface.

Route: <https://devprimevat.ibos.io/configuration/partnerConfig>

Task: Use Unit Of Measurement

Purpose: Review and use the visible page functions.

Required roles:

- No role restriction was identified

Prerequisites:

- None identified from the interface

Steps:

1. Open the Unit Of Measurement page.
2. Review the visible controls, fields, and table columns.
3. Choose the required available action for your work.

Fields and controls:

- **Name & Code Search:** Visible text control.
- **rows per page:** Visible select control.

Expected result: The requested page information or form is displayed.

Warnings:

- Only actions visible in the captured interface are documented.

Rows per page: 15 1-15 of 160

Page purpose: This page displays a list of customer and supplier profiles, allowing for filtering, searching, and viewing of business records.

Route: /configuration/roleManagement

Task: Filter Customer/Supplier list

Purpose: To narrow down the list of partners by their VDS status.

Required roles:

- No role restriction was identified

Prerequisites:

- User has access to the Configuration module

Steps:

1. Navigate to Configuration
2. Click on User Management
3. Select one of the radio buttons: 'All', 'VDS Applicable', or 'Without VDS Applicable'

Fields and controls:

- **Customer/Supplier Type:** Radio button group to filter by VDS status.

Expected result: The table displays only records matching the selected VDS criteria.

Warnings:

- No specific warning was identified

Search keywords: VDS, filter, partner status

Task: Search for a profile

Purpose: To find a specific customer or supplier record by name.

Required roles:

- No role restriction was identified

Prerequisites:

- User is on the Customer/Supplier Profile page

Steps:

1. Click into the 'Customer/Supplier Name Search' field
2. Type the name of the business entity
3. Press Enter or wait for the system to filter the table

Fields and controls:

- **Customer/Supplier Name Search:** Text input for searching by business name.

Expected result: The table updates to show only the entries matching the search term.

Warnings:

- No specific warning was identified

Search keywords: search, find business
