

User Manual

Operation module reference

Table of Contents

Page: Contract Manufacturing Issue

Page purpose: This page is used to view and manage raw materials issued for contract manufacturing processes.

Route: /operation/manufacturing/contactManufacturing

Task: View Contract Manufacturing Issues

Purpose: To list contract manufacturing issue records for a specific date range and branch.

Required roles:

- No role restriction was identified

Prerequisites:

- Access to the Manufacturing module

Steps:

1. Navigate to Operation > Manufacturing > Contract Manufacturing Issue
2. Select the Branch from the dropdown
3. Select the 'From Date'
4. Select the 'To Date'
5. Select the Issue Type
6. Click the 'View' button

Fields and controls:

- **Branch:** Select the relevant branch office.
- **From Date:** Starting date for the record search.
- **To Date:** Ending date for the record search.
- **Issue Type:** Type of manufacturing issue (e.g., Issue Raw Material).

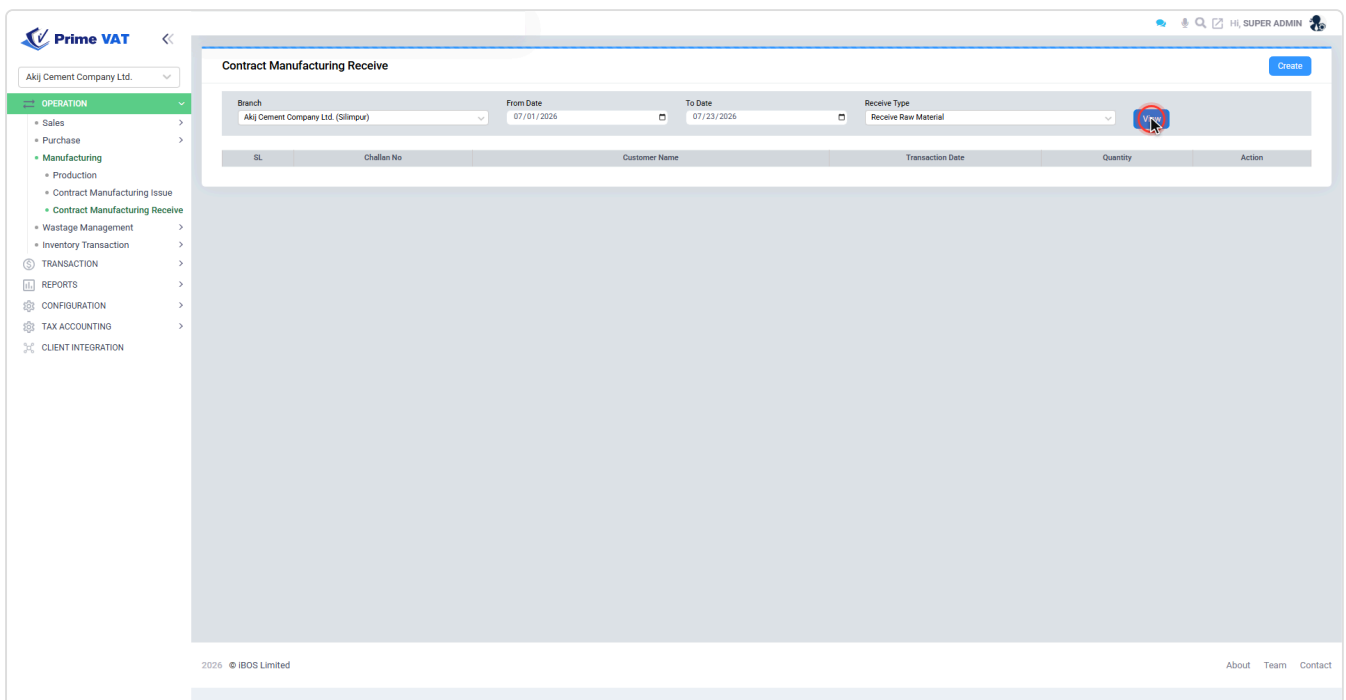

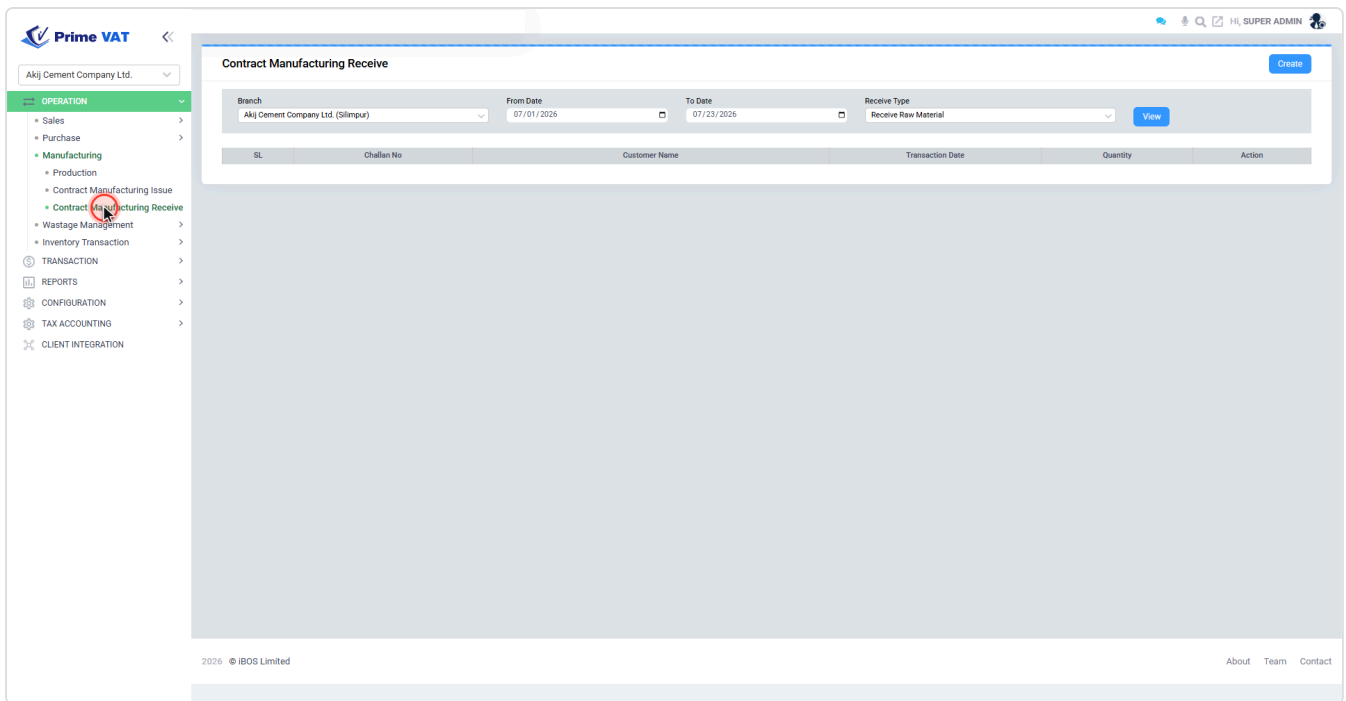

Expected result: A table displaying records matching the specified filter criteria appears.

Warnings:

- No specific warning was identified

Search keywords: manufacturing, issue, raw material, contract

Page: Contract Manufacturing Receive

Page purpose: This page is used to manage the receipt of raw materials back from contract manufacturing.

Route: /operation/manufacturing/contactMFGReceive

Task: View Contract Manufacturing Receipts

Purpose: To view records of raw materials received from contract manufacturing.

Required roles:

- No role restriction was identified

Prerequisites:

- Access to the Manufacturing module

Steps:

1. Navigate to Operation > Manufacturing > Contract Manufacturing Receive
2. Select the Branch
3. Define the date range using 'From Date' and 'To Date'
4. Select the Receive Type
5. Click the 'View' button

Fields and controls:

- **Branch:** The branch associated with the receipt.
- **From Date:** Beginning of the date range.
- **To Date:** End of the date range.
- **Receive Type:** The category of receipt (e.g., Receive Raw Material).

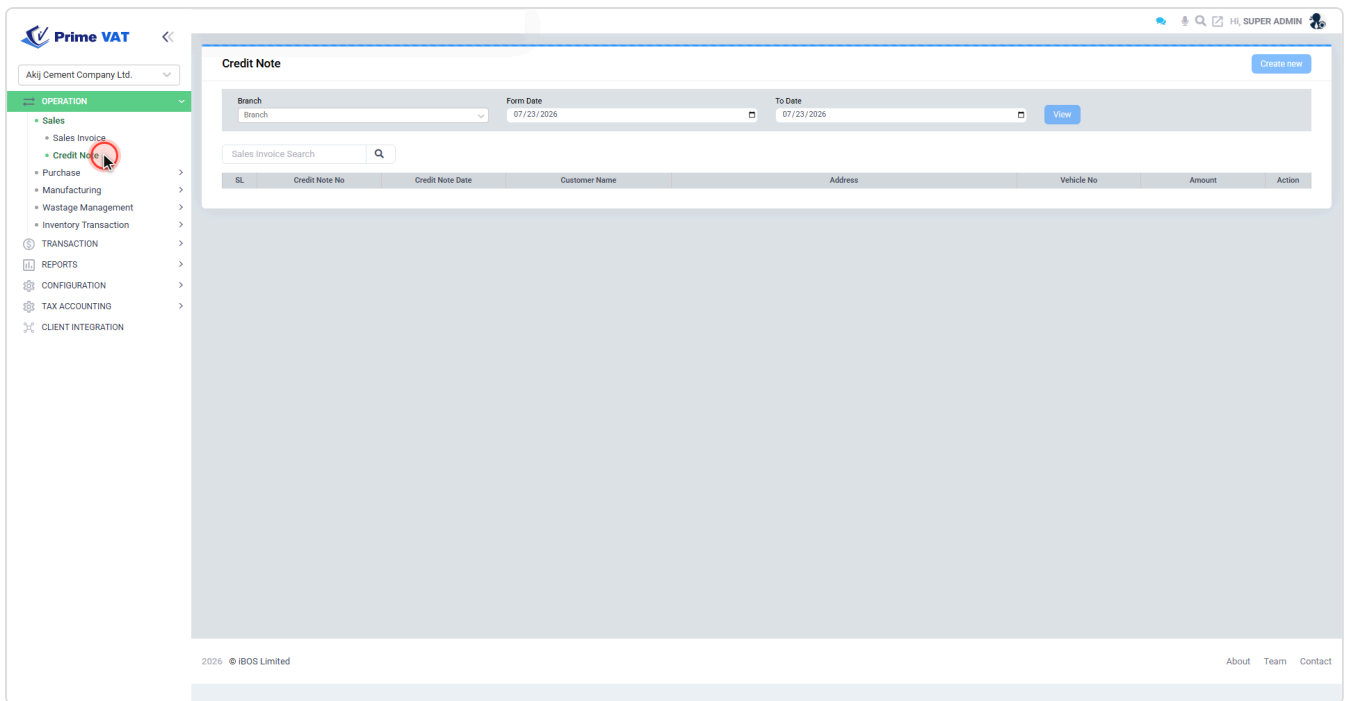

Expected result: A list of receipt transactions is displayed in the table.

Warnings:

- No specific warning was identified

Search keywords: receive, raw material, manufacturing, receipt

Page: Credit Note

Page purpose: This page allows users to view and search for sales credit notes.

Route: `/operation/sales/credit-note`

Task: Search Credit Notes

Purpose: To filter and locate specific credit notes issued to customers.

Required roles:

- No role restriction was identified

Prerequisites:

- Access to the Sales module

Steps:

1. Navigate to Operation > Sales > Credit Note
2. Select the Branch
3. Set the 'Form Date' and 'To Date'
4. Enter a value in the 'Sales Invoice Search' field
5. Click the 'View' button

Fields and controls:

- **Branch:** Select the branch for the credit note.

- **Form Date:** Start date for the search.
- **To Date:** End date for the search.
- **Sales Invoice Search:** Keyword search for specific sales invoices.

Expected result: Credit note records matching the search criteria are displayed.

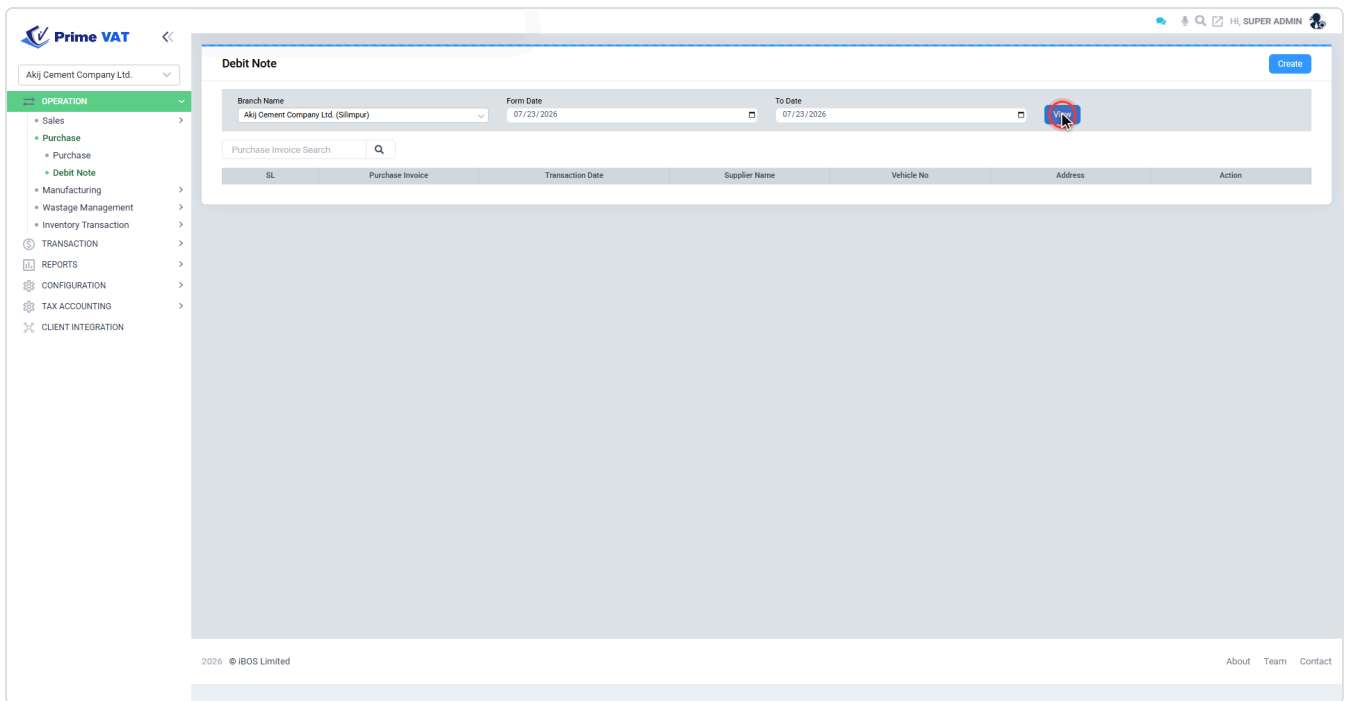

Warnings:

- No specific warning was identified

Search keywords: credit note, sales, invoice

Page: Debit Note

The screenshot displays the 'Debit Note' page in the Prime VAT system. On the left, a sidebar lists various modules under 'OPERATION', including Sales, Purchase, Debit Note (highlighted with a red circle), Manufacturing, Wastage Management, and Inventory Transaction. The main content area features a 'Debit Note' header with a 'Create' button. Below this, there are search filters: 'Branch Name' (set to 'Akij Cement Company Ltd. (Sillipur)'), 'Form Date' (07/23/2026), and 'To Date' (07/23/2026), each with a dropdown arrow and a 'View' button. A 'Purchase Invoice Search' field with a magnifying glass icon is also present. Below the filters is a table with the following columns: SL, Purchase Invoice, Transaction Date, Supplier Name, Vehicle No, Address, and Action. The table body is currently empty. At the bottom of the page, there is a footer with '2026 © IBOS Limited' and links for 'About', 'Team', and 'Contact'.

Page purpose: This page is used to view and search for purchase-related debit notes.

Route: `/operation/purchase/debit-note`

Task: View Debit Notes

Purpose: To list debit notes associated with purchase invoices.

Required roles:

- No role restriction was identified

Prerequisites:

- Access to the Purchase module

Steps:

1. Navigate to Operation > Purchase > Debit Note
2. Select the Branch Name
3. Specify the date range
4. Click the 'View' button

Fields and controls:

- **Branch Name:** Select the relevant branch.
- **Form Date:** Start date for reporting.

- **To Date:** End date for reporting.
- **Purchase Invoice Search:** Search for specific purchase invoices.

Expected result: The table populates with debit note details based on search filters.

Warnings:

- No specific warning was identified

Search keywords: debit note, purchase, invoice

Page: Item Destroy

The screenshot displays the 'Item Destroy' page within the Prime VAT application. The sidebar on the left lists various navigation options, with 'Item Destroy' highlighted under the 'Inventory Transaction' section. The main content area features a form with the following fields: 'Branch Name' (set to 'Akij Cement Company Ltd. (Sillimpur)'), 'From Date' (07/23/2026), 'To Date' (07/23/2026), and 'Item Type' (Purchase Book Item). A 'View' button is located to the right of the 'Item Type' field. The page footer includes the text '2026 © IBOS Limited' and links for 'About', 'Team', and 'Contact'.

Page purpose: This page is used to manage records of items that have been destroyed or written off.

Route: `/operation/inventoryTransaction/itemDestroy`

Task: View Destroyed Items

Purpose: To see a report of items destroyed within a specified date range.

Required roles:

- No role restriction was identified

Prerequisites:

- Access to the Inventory Transaction module

Steps:

1. Navigate to Operation > Inventory Transaction > Item Destroy
2. Select the Branch Name
3. Set the 'From Date' and 'To Date'
4. Select the Item Type
5. Click the 'View' button

Fields and controls:

- **Branch Name:** Select the branch for inventory tracking.
- **From Date:** Start date for the list.
- **To Date:** End date for the list.
- **Item Type:** Category of the items (e.g., Purchase Book Item).

Expected result: Displays a filtered list of destroyed items.

Warnings:

- No specific warning was identified

Search keywords: item destroy, write off, inventory

Search keywords: Purchase, sales

Page: Sales Invoice

Page purpose: This page provides a search and display interface for all sales invoices recorded in the system.

Route: /operation/sales/salesInvoice

Task: Search sales invoices

Purpose: To locate specific sales invoice records.

Required roles:

- No role restriction was identified

Prerequisites:

- User has access to Sales module.

Steps:

1. Navigate to Operation > Sales > Sales Invoice.
2. Select a branch in the Select Branch field.
3. Define the period using the From Date and To Date pickers.
4. Click the View button.

Fields and controls:

- **Select Branch:** Filtering by branch.
- **From Date:** Beginning of the invoice date range.
- **To Date:** End of the invoice date range.
- **BOE, BIN, Inv No Search:** Find specific invoices by reference.

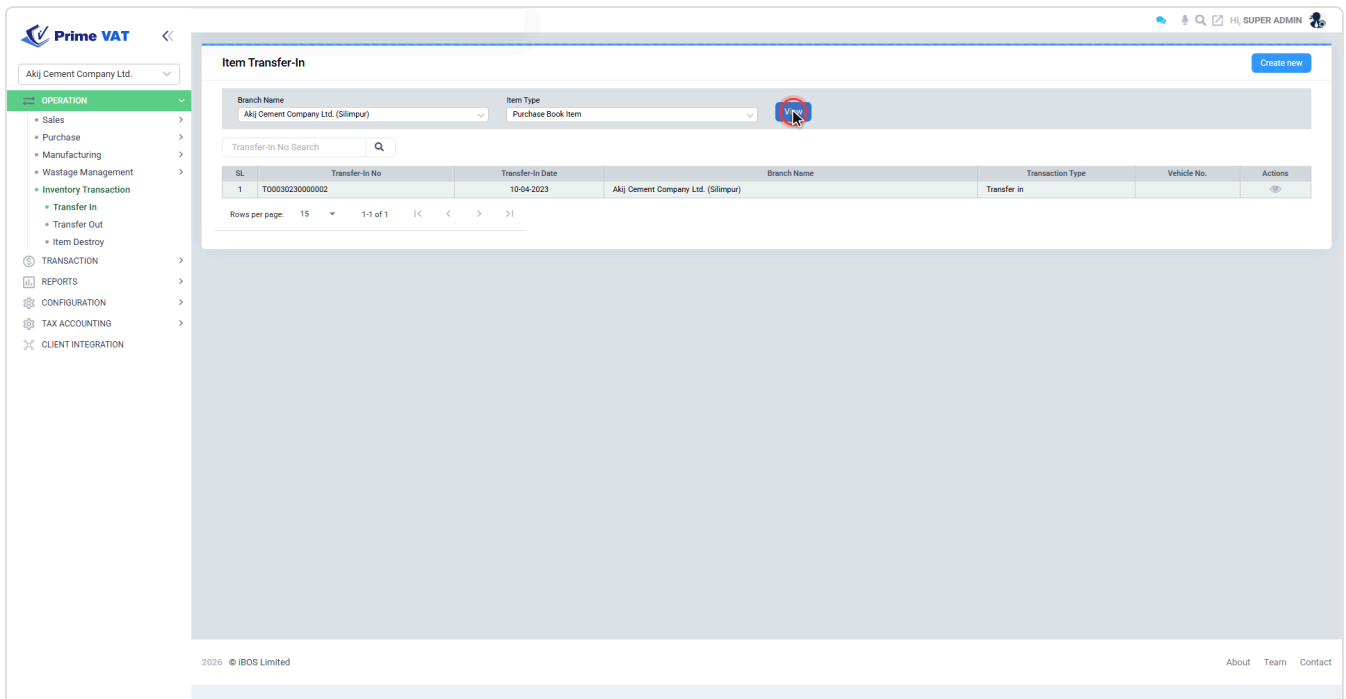

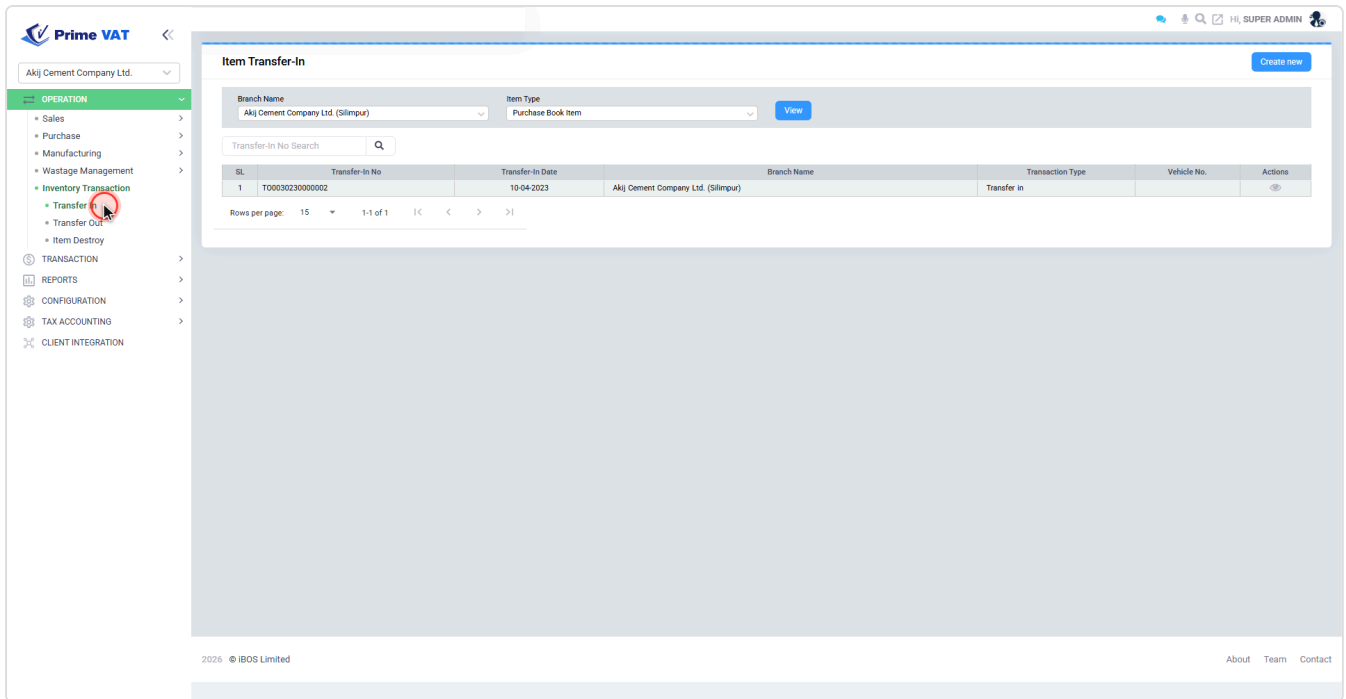

Expected result: Relevant sales invoices are shown in the table below.

Warnings:

- No specific warning was identified

Search keywords: sales, invoice, billing

Page: Transfer In

Page purpose: This page lists inventory items that have been transferred into the branch.

Route: /operation/inventoryTransaction/transferIn

Task: Filter transfer-in records

Purpose: To narrow down inventory transfers into the branch.

Required roles:

- No role restriction was identified

Prerequisites:

- User has access to Inventory Transaction.

Steps:

1. Navigate to Operation > Inventory Transaction > Transfer In.
2. Select the Branch Name.
3. Select the Item Type.
4. Click the View button.

Fields and controls:

- **Branch Name:** The target branch for the transfer-in.
- **Item Type:** Category of the inventory being transferred.
- **Transfer-In No Search:** Search by transfer number.

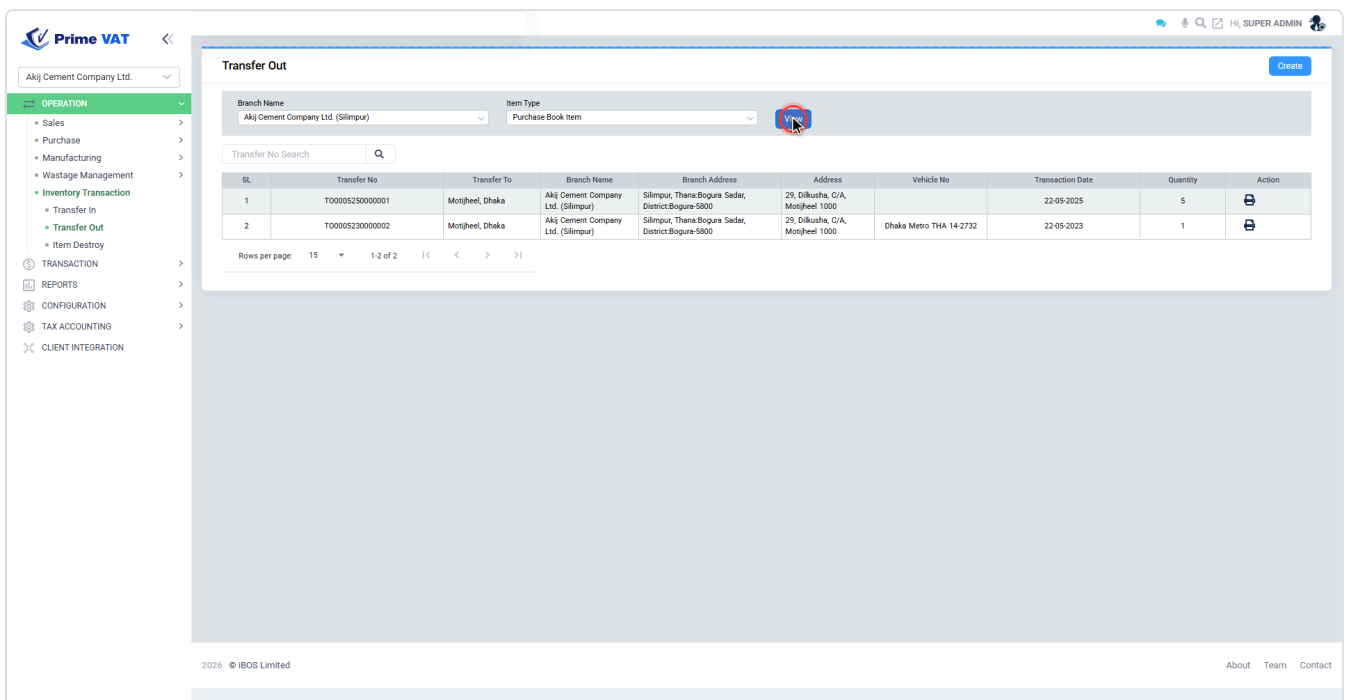

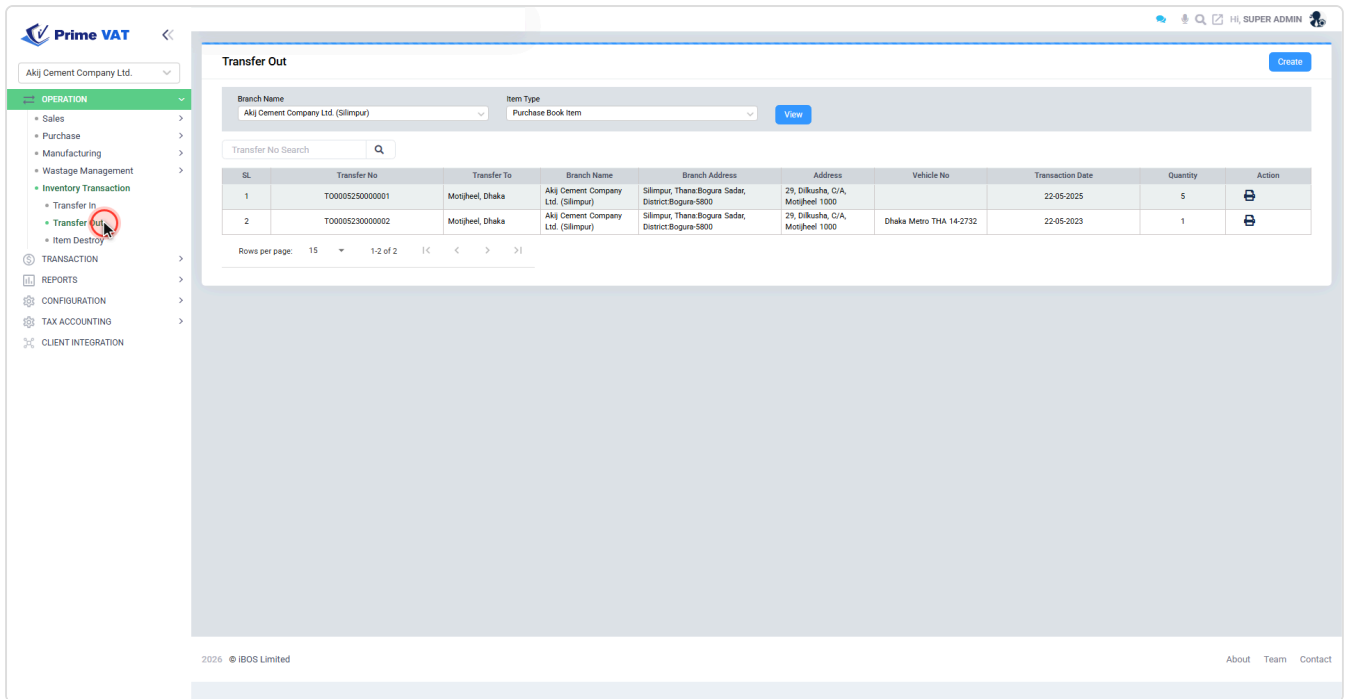

Expected result: Inventory Transfer-In records matching the selection are displayed.

Warnings:

- No specific warning was identified

Search keywords: transfer, inventory, stock

Page: Transfer Out

Page purpose: This page displays details of inventory transferred out from the current branch to another destination.

Route: /operation/inventoryTransaction/transferOut

Task: View transfer-out details

Purpose: To review the history and details of outgoing inventory transfers.

Required roles:

- No role restriction was identified

Prerequisites:

- User has access to the Inventory Transaction module.

Steps:

1. Navigate to Operation > Inventory Transaction > Transfer Out.
2. Select the Branch Name.
3. Select the Item Type.
4. Click View.

Fields and controls:

- **Branch Name:** Source branch of the items.
- **Item Type:** The type of inventory items.
- **Transfer No Search:** Search by specific transfer record number.

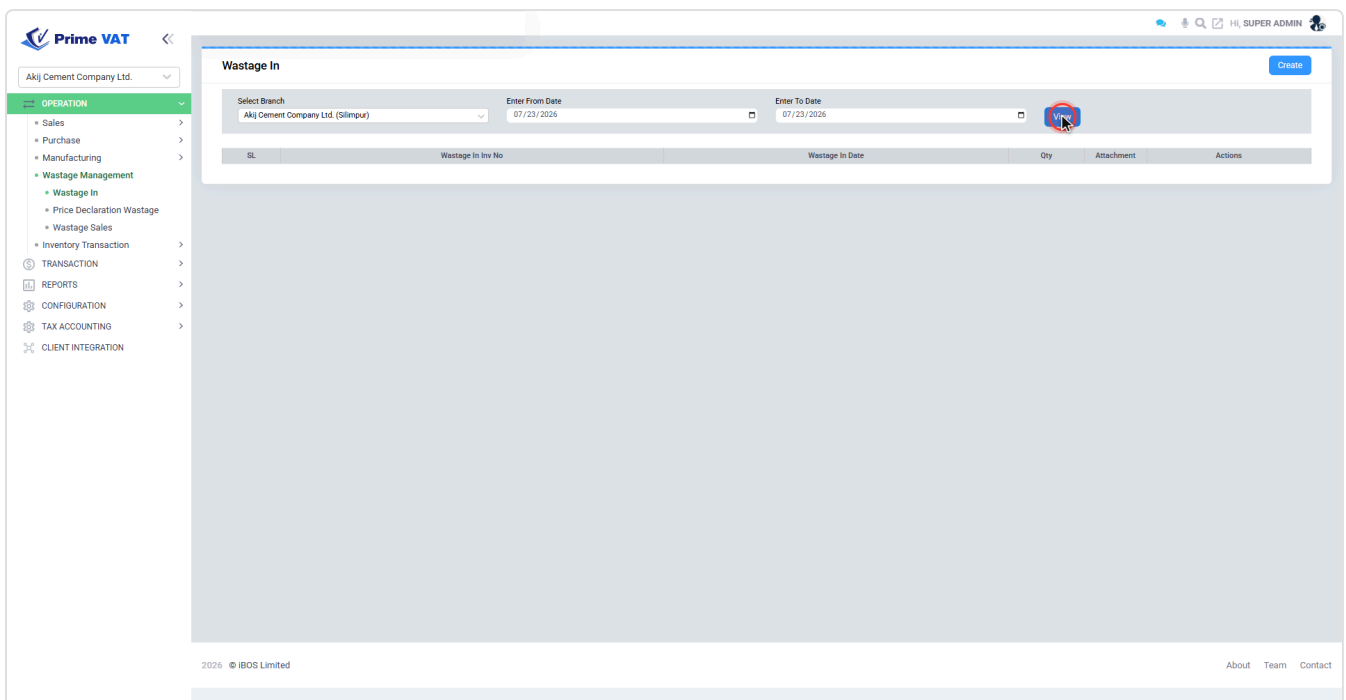

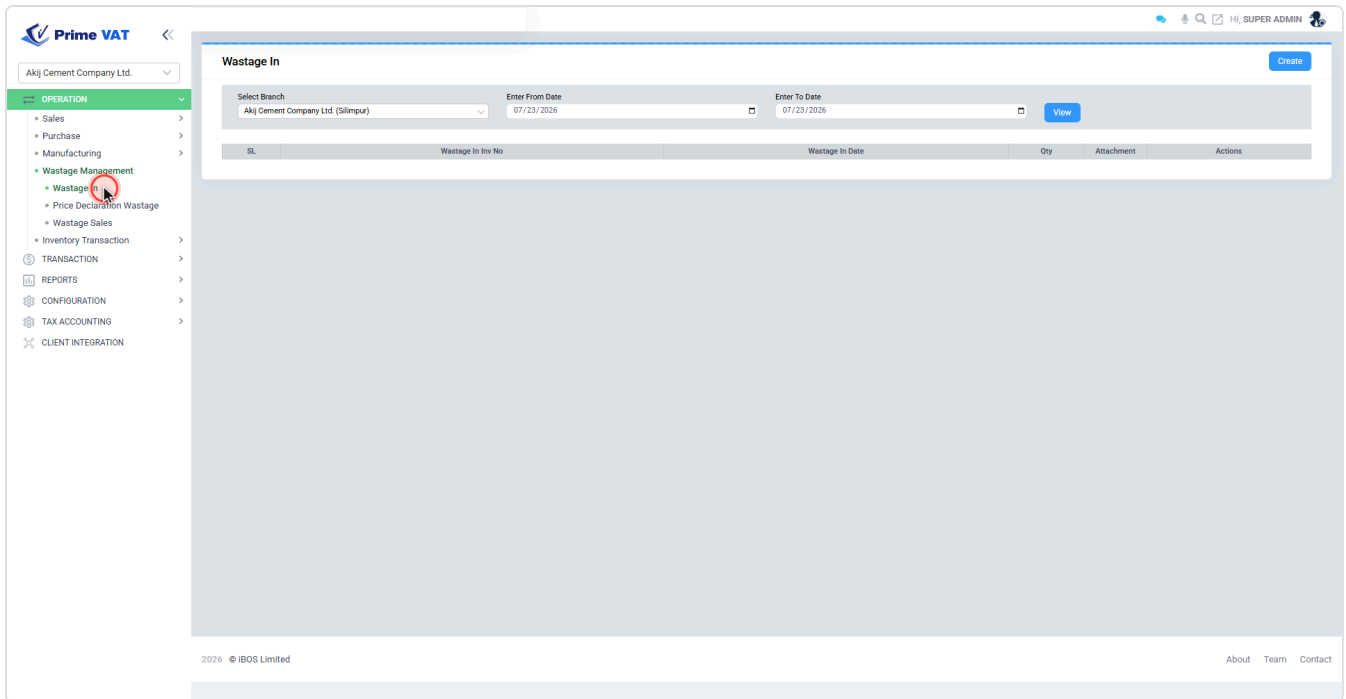

Expected result: A table showing transfers to other locations including destination, address, vehicle info, and date.
